## ABOUT

For over 35 years Daryn has worked within design consultants, contractor, developer and consultancy organisations, implementing & managing digital technologies & associated processes across sectors that include Defence, Education, Healthcare, Petrochemical, Pharmaceutical, Biotech, Transport, Judiciary, Commercial, Retail, Events & Residential. Daryn provides a wealth of knowledge and industry delivery experience & today supports public and private sector asset owner/client organisations in developing their digital strategies, project information & data requirements and upskilling teams.

Daryn also supports Middlesex Universities MSc BIM Management programme, is the technical advisor for LRQA's ISO19650 Accreditation scheme, assisting the recent UKAS pilot, and on behalf of the Institute of Asset Management and the Global Forum for Maintenance and Asset Management is assisting their technical documentation updates relating to information & data strategy.

Our industry constantly delivers opportunity to improve on the last project, whether it is within design, construction or how the built environment is managed. With the emergence of today's technologies such as Digital Twins, AI, VR, machine learning, generative design and predictive analytics we have an opportunity to advance our industry like never before, today we can be truly transformative, and make the necessary changes that will significantly improve the world around us.
