ABOUT

Formerly a BIM Coordinator and Architectural Technician. Joe's extensive experience in AutoCAD, Revit, & BIM 360, coupled with his project management skills, allow him to assume the responsibilities of assessing business goals.

Natural leadership and strategic planning capabilities permit him to effectively integrate the right mix of technology, processes, and training to address an organisation's unique needs.

Joe understands that maintaining a long-term, successful BIM strategy requires the dedicated support of a partner to stay current with technology, troubleshoot issues and look for additional opportunities to leverage BIM.
