

AECO/BIM SOLUTIONS SPECIALIST

KRIS SKIBNIEWSKI

SKILLS

Information Management (BS
EN ISO 19650)
Design Technology
Implementation
Project Coordination & Clash
Detection (Navisworks)
BIM 360 & ACC Specialist
Revit Architecture Expert
Design Standards
Development
Training & Knowledge
Transfer

KEY ORGANISATIONS

Keflavik International Airport
Iceland
RB Plant
Allford Hall Monaghan Morris
Kohn Pedersen Fox
Wimberly Allison Tong & Goo

ABOUT

Kris is an expert in CAD/BIM and Information Management, dedicated to optimizing design workflows and enhancing team collaboration within the AECO industry. With a foundation in architectural design, Kris has transitioned into a role where technology and efficiency take centre stage. His work revolves around implementing advanced design technologies that streamline project coordination, reduce errors, and improve overall project outcomes. Kris advocates for focusing on details, believing that small, thoughtful interventions drive significant improvements.

Details matter the most. Small, inexpensive changes can often impact more than expensive, large-scale interventions. The value of something usually depends on it being done slowly— the journey, not the destination, holds the value.
